Dimensions: 15" x 8.5" x 8"

Weight: 27 lbs.

Warm-Up time: Not necessary

Tank Capacity: 2 Liter Internal

Power Consumption: 1.4 amps

Fuse: 3A

No warm-up necessary!
Uses Haze-Liter™ liquid only!

Product Description:

No warm-up necessary! The Haze Generator™ is a heaterless fog machine with a high pressure pump creating an instant mist of fog. Comes complete with a 30 foot remote with L.E.D. indicators, manual and timer buttons, and fog duration and interval control. Great for clubs, DJ's, and special effects productions desiring a thin mist of fog. Comes with a hanging bracket. *Uses Haze-Liter™ liquid only!*

Operating Instructions:

Plug the Haze Generator™ into a standard 110V/120V supply. The unit will draw up to 1.4A of power. Connect the remote control to the rear of the machine. Make sure there is an adequate supply of fluid in the reservoir. To emit haze, press the red button on the remote for desired length of time, or adjust interval and duration knobs then press yellow timer button to activate. If haze does not come out, check the fluid tank .

Trouble Shooting and Service:

If you experience low output, pump noise, or no output at all, disconnect immediately. Do not attempt to continue pushing the remote button as this may damage unit. Check fluid level, the external fuse, remote connection, and check power from wall. If all of the above appear to be O.K., and the unit fails to operate correctly, the unit will require service. Return the machine to an American DJ Authorized dealer or service center.

We recommend you fill out the enclosed warranty card to validate your purchase.
