Digital Monitor Series Stereo Headphones

Once you plug in a pair of Audio-Technica Digital Monitor headphones, the only thing you'll desire is more listening time. That's because the ATH-M2X and ATH-M3X were specifically designed to reproduce the wide dynamic range found in digital program materials. Their high-performance drivers and low-mass diaphragms provide maximized power handling capability with improved frequency and transient response. Choose the open-back ATH-M2X for its clean, linear low-end, or the closed-back ATH-M3X for better isolation and powerful bass.

Both models have soft cushioned earpads and an adjustable headband that ensure hours of listening comfort.

ATH-M2X

Open-back dynamic

Diameter of drivers 40 mm

Frequency Response 20-20,000 Hz

Sensitivity 100 dB

Impedance 32 ohms

Maximum Input Power 100 mW

Cable 11.5' (3.5 m) with 3.5 mm stereo mini-plug

Accessory Included 1/4" (6.3 mm) plug adapter

Weight (without cable and plug) 4 oz (115 g)

ATH-M3X

Closed-back dynamic

Diameter of drivers 40 mm

Frequency Response 20-21,000 Hz

Sensitivity 100 dB

Impedance 32 ohms

Maximum Input Power 100 mW

Cable 9.8' (3 m) with 3.5 mm stereo mini-plug

Accessory Included 1/4" (6.3 mm) plug adapter

Weight (without cable and plug) 5 oz (140 g)
