

Product Description

The Numark VM03 is a 3 screen/6 input LCD video display monitor designed for any video monitoring application. The advanced design of the VM03 allows the user to monitor his video source in either a rack mount or table top application. What separates the VM03 from other video monitors in the market is the adjustable design of the viewing angle. This unique and original design allows the video producer/engineer to properly position the viewing angle of the VM03 up to 96 degrees. The feature works while the VM03 is either being used on a table top or mounted in a professional rack (3U spaces required). This flexibility in viewing angle is ideal for DJ and broadcast applications, where limited space may prohibit easy viewing angles.

Features

- Three 5" (127mm) diagonal color TFT-LCD screens
- Ideal for video monitoring applications
- Two composite video inputs with built-in video switch per screen allowing viewing of up to 6 sources
- Pass-through output for daisy-chaining to another video input device
- Tilt adjustment for optimum viewing angle
- Rugged rack-mountable design
- PAL and NTSC-compatible
- Universal power supply

Weight:

9 lbs

Dimensions:

19" x 2 3/8" x 5 1/8" (W x L x D)
